TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Specialist 

RE: Site Inspection, Lanny Jensen, Cream Time Quarry, S/039/009, Sanpete County, Utah

Date of Inspection: August 1, 2001

Time of Inspection: 4:00 p.m.

Conditions: Clear, warm

Participants: Zack Jensen, Cream Time Quarry; and Lynn Kunzler, DOGM

Purpose of Inspection: inspect reclamation work to abate potential non-compliance.

As per the telephone conference with Mr. Jensen on June 21, 2001, regrading of sufficient acreage to reduce the disturbed area to less than 5 acres was to be completed by August 1, 2001. Upon arrival at the site, it was noted that reclamation activities were still ongoing. Mr. Coleman, of Coleman Excavating was finishing regrading work on approximately 2.5 acres that was being reclaimed (regrading of approximately 2 acres had been completed). Approximately 100 yds³ of topsoil still needed to be respread. Mr. Coleman expected to be completed by the end of the next day. The operator plans to seed the area in late October, 2001, to complete the reclamation. This action will effectively reduce the current disturbed acreage to approximately 3.75 acres.

While regrading of the entire parcel (2.5 acres) was not complete, an estimated 2 acres had been completed. This is sufficient to meet the intent of the order to reclaim down to less than 5 acres. The operator was reminded that the area still needed to be seeded in October, and that failure to do so could result in the Division pursuing the non-compliance issue.

Several photos were taken to document site conditions.
